Sickle cell disease (SCD) and thalassaemia service for babies, children and young people

This leaflet gives more information about what the SCD and thalassaemia service can do to help you and your child with their condition.
About our service
The paediatric (children’s) sickle cell and thalassaemia team run a specialist and comprehensive care service for children and young people in south east London who are born with these inherited disorders.

The service we provide begins at birth and continues until patients are transferred to the adult team.

We are based at Evelina London Children’s Hospital on the St Thomas’ Hospital site (Westminster Bridge Road). If Evelina London is not your local hospital, we will work closely with your local NHS service to help you receive the specialised care that you need, both in hospital and in the community.

Within the service, our specialist adolescent team will make sure there is a smooth transfer from children’s care to adult care when the time comes.

Clinics
We hold regular clinics every Friday, 9am-1.30pm at Evelina London on the ground floor (Ocean). Please arrive for your appointment on time to help us run the clinic smoothly and avoid delays.

What happens in clinic
Please check in with the receptionist when you arrive and let them known if any of your contact or personal details have changed. Your child’s weight and height will be taken by a nurse before you see the doctors. They will also note your child’s blood pressure and oxygen saturation levels.
You will then be called to see one of the doctors who will talk to you and your child and examine them. You might not see your consultant, but a registrar doctor who works closely with the team. The doctor will discuss any concerns you have regarding managing your child’s condition and making sure that they take their medications as prescribed.

If your child needs a blood test, they will be ordered on the computer system and we will ask you to go to the Blood Test Centre for this (in the main St Thomas’ Hospital).

Any other tests that may be needed, such as urine, immunisations, X-rays, ultrasound or a transcranial Doppler scan (TCD) will be explained and arranged by the doctor or specialist nurse you see in clinic.

**Who your child might see in clinic**
Your child may also see one of the following members of our team:
- clinical nurse specialist
- research nurse
- community nurse specialist
- psychologist.

**Therapy and psychology team**
Our psychologists work in the children’s psychological medicine and the child and adolescent mental health service (CAMHS) liaison teams. They are part of clinic consultation. A referral can be made to see them for assessment and treatment of emotional difficulties, including managing SCD, and their medications.
Research
The hospital is also a major research centre. During your visit you may be asked if you are willing for your child to take part in a research study. You are under no obligation to do so. If you decide not to take part in research, it will not affect your child’s treatment.

Community services
We work closely with the community specialist sickle cell and thalassaemia nurses. Certain parts of your child’s care are best provided by them rather than us. With your consent, we can refer you to them if you need support.

They can provide
- home visits
- genetic counselling
- pre-conception screening
- support with housing and other social issues
- a care plan for schools
- help with benefits application
- access to the patient support group
- health promotion.

Joint specialist clinics
We work closely with other specialists to provide joint care for your child. If your child needs to be seen in one of these clinics, we will explain why.

In these clinics, your haematology consultant and a specialist consultant will see you together.
Joint respiratory clinic
Third Wednesday of every month, 9am-4pm.

Joint neurology clinic
Third Thursday of every month, 9am-1pm.

Joint nephrology clinic
Third Tuesday of every month, 1.30-6.40pm.

Joint endocrine clinic
Fourth Friday, three-monthly, 9am-12pm

Transition service
The transition service is involved in planning your child’s care and supporting them to move from the children’s to the adults’ hospital. As your child has a chronic condition that will require ongoing treatment, it is important that you understand and prepare for the changes they will go through as they grow, and what this means to their care.

The transition team will discuss a number of issues with you. Their aim is to help you understand your child’s condition better and to prepare you and your child for the transition to adult services.

Transition clinic
Second Thursday of every month, 5-7pm

Cancelling appointments
If you cannot make an appointment, please contact the outpatient appointment department, t: 020 7188 4000, as soon as possible and reschedule an appointment that is convenient.
Admission to hospital
If your child is very unwell, they may be admitted onto one of the following wards.

Mountain Ward: Medical/Surgical, 5th Floor
Forest Ward: Paediatric intensive care unit (PICU), 2nd Floor

If your child requires a blood transfusion, an MRI under general anaesthetic, or a day review, they will be admitted onto Snow Fox Ward, which is open from Monday to Saturday, 7.30am-8pm (excluding bank holidays), and is in St Thomas’ Hospital, South Wing, Staircase D, First floor.

Your child may be seen by other doctors from other teams if they are admitted over the weekend or after hours, Monday to Friday. They will liaise closely with the haematology consultant.

The spiritual team
The members of the Spiritual Health Care Team work together to give spiritual care to patients, families or friends of all faiths and beliefs, as well as people who do not have a particular faith. Please let the Spiritual Health Care Team know if you would like any spiritual care resources such as a prayer mat, Bible, Qur’an, cross, rosary, prayer beads or any other appropriate resource. We will do our best to provide this for you. If you wish to continue receiving spiritual support after you leave hospital, please speak to us and we will try to put you in touch with the relevant group.
Spiritual care at St Thomas’ Hospital

The Chapel
The chapel is on the First Floor of South Wing. It is open every day for quiet prayer and reflection, from 7am-8pm.

Multi-faith prayer rooms
Multi-faith prayer, belief and reflection rooms are open daily. They are on the Ground Floor of South Wing. Washing facilities are next door.

For spiritual or religious resources, or more information, please contact, t: 0207 188 5588, e: chaplains@gstt.nhs.uk
